Change in international search fee charged by the European Patent Office (EPO) effective May 7, 1985 and change in International Fees effective May 28, 1985.

The International Bureau of the World Intellectual Property Organization has informed the US Patent and Trademark Office that, due to the favorable exchange rate of the US dollar with regard to the Deutschmark and the Swiss franc, the dollar amount of the international search fee charged by the European Patent Office and the International Fees for PCT applications filed in the United States Receiving Office will decrease.

Effective May 7, 1985 the amount of the international search fee charged by the European Patent Office for PCT applications filed in the United States Receiving Office will be $620.00.

Effective May 28, 1985 the amount of the International Fees for PCT applications filed in the United States Receiving Office will be:

Basic Fee (first 30 pages)	$230.00
Basic Supplemental Fee (each page over 30)	4.00

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on applications filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), effective Nov. 1, 1984. If the maintenance fee is not paid in a patent requiring such payment, the patent will expire on the 4th, 8th or 12th anniversary of the grant.

Attention is drawn to the patents which were issued on Apr. 13, 1982 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Plant Patents	None
Utility Patents	4,324,003 through 4,325,147

Reissue Patents based on the above identified patents.

No maintenance fees are required for design patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

Amendments to Patent Cooperation Treaty

The 11th session of the PCT Union Assembly held in Geneva, Switzerland from 30 Jan. to 3 Feb. 1984 decided to amend two time limits in the Treaty (Articles 22(2) and 39(1)(a)) and to revise approximately one hundred provisions in the PCT Regulations.

The assembly decided that all amendments would enter into force on Jan. 1, 1985, subject to the following:

(i) the amendments to Rules 12.1(c) and (d), 34.1 and 48.3(a) and (b) will become applicable at the same time that the PCT will enter into force in respect of the first Spanish speaking country to ratify or accede to the PCT;

(ii) the deletion of Rule 80.6(b) will become effective on Jan. 1, 1986;

(iii) some countries may, under certain circumstances, delay, for a transitory period, the application, by them, of some of the amendments. Delays required by U.S. law are noted below.

The purpose and a brief description of the most important amendments are indicated below.

Making the Procedure During the International Phase Under Chapter I of the PCT Safer and Simpler for the Applicant.

The Assembly adopted very important amendments giving the applicant the means to ensure that his or her international application will not be lost because the record copy has not reached the International Bureau in due time (see Rules 20.5 and 22.1). The time limit at the expiration of which the international application would be considered withdrawn under Article 12(3) if the record copy had not reached the International Bureau will start running only when a notification is sent by the International Bureau to the applicant (see Rule 22.3), and the new system as resulting from those various amendments will completely replace the "alternative" procedure previously provided by Rule 22.2.

Other amendments will have the effect that the one-month grace period for the payment of the international fee and the search fee will be granted by all Receiving Offices, subject to some transitional provisions, (see Rule 15.4).

Amendments were adopted which will expressly allow the time limits fixed by the Receiving Office for the correction of defects to be extended and will ensure that no international application will be considered withdrawn by the Receiving Office for lack of compliance with physical requirements if it complies with those requirements to the extent necessary for the purpose of reasonably uniform international publication (see Rule 26).

The time limit within which the applicant may amend the claims during the international phase will be longer in certain cases. Furthermore, the applicant will have the possibility to state more in his or her explanations of amendments and will be permitted to submit the amendments in the language of publication only. (See Rule 46).

The amendments to Rules 32 and 32 bis, make it possible to withdraw the international application, designations, or the priority claim by filing a notice with the Receiving Office even after the latter has sent the record copy to the International Bureau. The Assembly noted that the international application would not be published if the withdrawal reached the International Bureau before the completion of the technical preparation for international publication, which is not earlier than 15 days before the expiration of 18 months from the priority date.

The rules concerning the rectification, during the international phase, of obvious errors in documents were liberalized by allowing the rectification of obvious errors which are not errors of transcription (see Rule 91). Furthermore, the applicant may, if the rectification has been refused during the international phase, obtain publication of the request for rectification in the pamphlet publishing the international application. Such publication, however, will not relieve the applicant from the need to request, during the national phase, the Designated Offices to authorize the rectification.

New rules were adopted which deal with Designated States excusing delays in meeting certain time limits, in particular, time limits pertaining to the international phase and the time limit for entering the national phase (see Rule 82bis). In that connection, it was understood by the Assembly that the excusing of the delay may take place only during the national phase and under the conditions set forth by the national law.

Making the Procedure Under Chapter II of the PCT More Attractive for the Applicant.

A very important amendment adopted by the Assembly consisted of modifying the time limit under Article

Article 39(1)(a) for entering the national phase before elected Offices. Subject to some transitory provisions, the 25 month time limit has been extended to 30 months. The Assembly also decided to extend the time limit to 28 months from the priority date to establish the international preliminary examination report: where preliminary examination has been demanded before the expiration of the 19th month from the priority date. The said extensions give applicants more opportunities to present arguments to the International Preliminary Examining Authority and more time for thorough international preliminary examination. (See Article 39 and Rules 66.4 and 69.)

Note that Chapter II procedure is *not* currently available to United States residents or nationals filing in the United States Receiving Office or to international applications as to designations of the United States of America.

Making it Safer and Simpler for the Applicant to Enter the National Phase.

The Assembly modified the time limit under Article 22(2) in order to harmonize it with the time limit under Article 22(1). This amendment means that, subject to some transitory provisions, the time limit for entering the national phase before the Designated Offices will be 20 months from the priority date in *all* cases, even where the International Searching Authority declares that no international search report will be established. In the latter case, under the previous text, the time limit was shorter.

The Assembly adopted new rules specifying the requirements for entering the national phase, in particular, the contents of the translation of the international application to be furnished when entering the national phase. (see Rules 49.3 to 49.5, 51 bis and 74). It is now clear that the applicant must be given an opportunity *after* entering the national phase before the Designated Office, for furnishing evidence—where evidence is required under the national law—as to the identity of the inventor if not the applicant, the applicant's right to file when he or she is not the inventor or circumstances making an earlier disclosure non-prejudicial. Also, if the applicant did not appoint a local agent when the national phase is entered, that he or she must be given an opportunity, *after* entering the national phase, to appoint a local agent where he or she is, under the national law, obliged to be represented by such an agent.

Including Certain Patent Documents Published in the Spanish Language into the PCT Minimum Documentation and Including the Spanish Language Among the Languages of Publication of International Applications.

It is expected that the very important amendments adopted by the Assembly in that connection will make it easier for Spain and for Spanish-speaking countries of Latin America to join the PCT Union (see Rules 12.1(c) and (d), 34.1 and 48.3(a) and (b)).

Simplifying the Tasks of the International Authorities Involved in the PCT Procedure and Simplifying the PCT Regulations in General.

The Assembly adopted a number of amendments in that connection, in particular, through the transfer of Rules or parts of Rules which are of no direct interest to applicants to the Administrative Instructions under the PCT and the deletion of some obsolete Rules. It is to be expected that after this very comprehensive revision of the Regulations, there will be a longer period during which no, or only very few, changes will be necessary in the PCT system.

Comments on particular changes:

Decisions Concerning Articles 22(2) and 39(1)(a)

Decision concerning Article 22(2)

The Assembly, in order to make the same time limit applicable under paragraphs (1) and (2) of Article 22, decided as follows:

Article 22(2) is modified as follows:

"*Where the International Searching Authority makes a declaration, under Article 17(2)(a), that no international search report will be established, the time limit for performing the acts referred to in paragraph (1) of this Article shall be *the same as that provided for in paragraph (1)*."

The modification consists of replacing the words "two months from the date of the notification sent to the applicant of the said declaration" by the underlined, it also consists of deleting, before the word "Where," the words "Notwithstanding the provisions of paragraph (1)".

The modification entered into force on Jan. 1, 1985. However, as long as that time limit is incompatible with the national law applied by the Designated Office, a time limit of two months from the date of the notification sent to the applicant of the said declaration shall, during that transitory period, apply with respect to that Designated Office, provided that such Office has made a notification to that effect to the International Bureau.

Decision Concerning Article 39(1)(a)

The Assembly, in order to extend the time limit under Article 39(1)(a) from 25 to 30 months from the priority date, decided as follows:

Article 39(1)(a) is modified as follows:

"if the selection of any Contracting State has been effected prior to the expiration of the 19th month from the priority date, the provisions of Article 22 shall not apply to such State and the applicant shall furnish a copy of the international application (unless the communication under Article 20 has already taken place) and a translation thereof (as prescribed), and pay the national fee (if any), to each elected Office not later than at the expiration of 30 months from the priority date."

The modification consists of changing "25" to "30".

As noted above, Article 39 relates to procedures under Chapter II which are not currently available to applicants filing in the United States Receiving Office or in international applications when entering the United States as a Designated Office.

The modification of Article 39 entered into force on January 1, 1985. However as long as the said time limit of 30 months is incompatible in all cases with the national law applied by the elected Office, a time limit of 25 months from the priority date shall, during that transitory period, apply with respect to that elected Office, provided that such Office has made a notification to that effect to the International Bureau.

Attention is Directed to Important Amendments to the Regulations Affecting United States Applicants.

Rule 4 relates to the contents of the Request. The changes provide for correction of any obvious errors and correction of the application number of the priority application before the Receiving Office.

Rule 15.4: The amendment sets the period for payment of the basic fee and the international search fee to all the Receiving Offices at one month from the date on which the international application was received; the same applies to the period for payment of designation fees when the application is filed on expiry of the priority period. The provisions in paragraphs (a) and (b) are not yet in effect in the United States under the provisions of Rule 15.4(d).

The amendment makes it clear that the amount to be paid when the fees or their equivalents are increased between the date of filing of the application and the date of payment; the amount to be paid is the lower amount.

Rules 22.1(b) and 22.3 together with Rule 20.5(c): These amendments provide for a system whereby the International Bureau monitors the receipt of the record copy of the international application, and the Receiving Office, and where appropriate the applicant, is notified so that the record copy can be produced if the Receiving Office is late in sending it; at the same time, the

amended version of Rule 22.3 introduces a new time limit under Article 12(3) of the Treaty, which begins when such notifications are sent out.

Rule 26.2: Under certain circumstances, the rule now provides that the Receiving Office can extend the time limit for the correction of certain elements in the international application.

Rule 46: The amended Rule makes it easier to submit amended claims within the time limit during the international phase.

Rules 49.5 and 51bis: The new Rules set out the conditions applying to entry into the national or regional phase and in particular those concerning the contents of and physical requirements for the translation under Article 22(1) or 39(1) of the Treaty and the national requirements dealt with in Article 27.

Rule 91: The main purpose of the amendments to this Rule is to enable the applicant, on payment of a fee, to request the publication, at the same time as the international application, of a request for rectification which has been rejected during the international phase.

A copy of the amendments to the PCT Articles and Rules appears below.

Acting Commissioner of Patents and Trademarks.

Decisions of the Assembly Concerning Articles 22(2) and 39(1)(a) of the Patent Cooperation Treaty (PCT) and Amendments to the Regulations Under the PCT as Adopted by the Assembly

Decisions Concerning Articles 22(2) and 39(1)(a)
Decision Concerning Article 22(2)

The Assembly, in order to make the same time limit applicable under paragraphs (1) and (2) of Article 22, decides as follows:

(1) Article 22(2) is modified as follows:

"Where the International Searching Authority makes a declaration, under Article 17(2)(a), that no international search report will be established, the time limit for performing the acts referred to in paragraph (1) of this Article shall be *the same as that provided for in paragraph (1)*."

(2) The modification enters into force on Jan. 1, 1985. However, as long as that time limit is incompatible with the national law applied by the designated Office, a time limit of two months from the date of the notification sent to the applicant of the said declaration shall, during that transitory period, apply with respect to that designated Office, provided that such Office has made a notification to that effect to the International Bureau.

(3) The notification referred to in paragraph (2) shall be addressed to the International Bureau before Oct. 1, 1984. It shall be promptly published by the International Bureau in the Gazette, and it shall become effective on Jan. 1, 1985.

(4) Any notification effected under paragraph (3) may be withdrawn at any time. Such withdrawal shall be promptly published by the International Bureau in the Gazette, and it shall be effective 2 months after its publication in the Gazette or at any later date as indicated in the notice of withdrawal.

*The modification consists of replacing the words "two months from the date of the notification sent to the applicant of the said declaration" by the words underlined; it also consists of deleting, before the word "Where," the words "Notwithstanding the provisions of paragraph (1),"

Decision Concerning Article 39(1)(a)

The Assembly, in order to extend the time limit under Article 39(1)(a) from 25 to 30 months from the priority date, decides as follows:

(1) Article 39(1)(a) is modified as follows:

"If the election of any Contracting State has been effected prior to the expiration of the 19th month from the priority date, the provisions of Article 22 shall not apply to such State and the applicant shall furnish a copy of the international application (unless the communication under Article 20 has already taken place) and a translation thereof (as prescribed), and pay the national fee (if any), to each elected Office not later than at the expiration of *30** months from the priority date."

(2) The modification enters into force on Jan. 1, 1985. However, as long as the said time limit of 30 months is incompatible in all cases with the national law applied by the elected Office, a time limit of 25 months from the priority date shall, during that transitory period, apply with respect to that elected Office, provided that such Office has made a notification to that effect to the International Bureau.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
